1.Branding

Our branding is make by the use of our website. our website is going to be a map video browser to introduce the hometown of every group member.

The logo is a position mark on google map showing this website's use, yellow color for ground and blue color for ocean. The acronym from both our teammate's names have been put in the middle showing our teammate are in the same place now.

2.Colors

The colors we choose is blue, black, red, yellow and white. We don't want to use too many colors to make our website messy. Therefore, black for most of text, white for back ground, blue and yellow for highlight and little bit red for notification.

3.Typography

The font we choose for heading (h1, h2) is "Open Sans". and Times New Roman for body text.

4.Buttons

We have 3 different kinds of button, blue, yellow and black. The reason why we chose them is depending on the web page's main color.

5.Icons

The icons we use will have share link to Facebook and twitter. These icons will be use on button.

6.Form

There are 6 type for use to input. Three for text input and 3 for select input. When user want to input, normal form will display with gray frame. If input is success, the frame will become green. If input is fail, the frame will become red. The

focusing input form will have yellow frame to keep attention of user.

7.Map

A map display tool will be needed, so we are using GoogleMaps API.

8.Identify of the web components:

Map video browser:

1.map display (google map)

2.list to store place name and detail

3.video when user click into the list (part of detail)

4.back to front page button

Single page blog CMS

1.display individual blog post

2.list of blog posts

3.display the most recent post

4.can see individual blog posts
